

Product designer and builder with 3 years of experience *designing products from 0 to 1 and tinkering products that are at-scale.*

Drawn to explore the next frontier of human-AI interaction, and business-driven products.

● DESIGN

AI-native Product Design, Rapid Prototyping, Design Engineering, UI/UX, Design System, Motion Design, Brand Design, Illustration, Product Strategy, A/B Testing

● TECHNICAL

Full-Stack Engineering, Front-End Engineering, Vibe Coding, Data Analysis, Backend API

● TOOLS

Figma, Claude Code, Codex, Cursor, Framer, Procreate, Adobe Creative Suite, HTML/CSS, Typescript

● LANGUAGES

English, Mandarin, Japanese

● EDUCATION

Barnard College, Columbia Univeristy

SEP 2024 → MAY 2028

- B.A. in Cognitive Science (Concentration: Human-Computer Interaction Design), Minors in Economics & Political Science
- *Relevant Coursework:* Artificial Intelligence, COMS4701W; Machine Intelligence; User Interface Design; Advanced Programming

● EXPERIENCE

Product Designer • Opusclip (Series B, \$2B+) • Contractor

JUNE 2026 → PRESENT

- Led the redesign of the agent-powered video clipping process on web app for 5M consumers, and shipped 12+ high-fidelity prototypes on Figma.
- Audited and redesigned the prompt to video clipping workflow end-to-end for AgentOpus, helped the product achieved a 23% user growth.
- Built a new AI video editor in the video clipping studio, increased 8% in-feature retention rate.
- Redesigned video generation process, increased the average generation completion by 68%.

Product Designer, Founder • Lluna (YC AI School S26)

MAR 2026 → MAY 2026

- Led the design and development of the agentic skincare consultation workflow from 0 to 1, including the dashboard on PC for medical spas and mobile web app for consumers, and shipped 10+ prototypes via Claude Code and Figma MCP on local server.
- Designed, developed and deployed QR-based smart menu flow, AI recommendation engine, sales AI support flow within 2 weeks, increasing 8% in per clinic visitor spending.
- Conducted 30+ user interviews with medical spas to define end-to-end user flows and signed \$1.6k ACV.
- Selected to Y Combinator AI Startup School 2026 with around 5% acceptance rate.

Product Designer • HeyGen (Forbes 2026 AI 50, \$2B+) • Internship

MAY 2025 → SEP 2025

- Designed 15+ high-fidelity design iterations of the dashboard notification tab, navigation bar, and integrations page for the web app, enabling rapid product iteration for a \$100M+ ARR product for 15M+ prosumers.
- Built the new color selector, and added 5 more captions for mobile video editor, boosting user engagement by 8%.
- Designed and created life-cycle campaign banners, APS assets, and 5+ video templates with the product and GTM team, increasing 15%+ downloads for the product.

Product Intern • SenseTime Group Inc. • Internship

NOV 2024 → JAN 2025

- Designed and test A/B onboarding flows of Vibeme (AI dating app), improving 7-day activation rate by 9%
- Conducted 50+ user interviews to identify onboarding friction and improve UX design

● LEADERSHIP

Design Lead, Product Designer • Design at Columbia

SEP 2025 → PRESENT

- Led design of ChatGPT mini app with 3 product designers.

Co-Founder • AdventureX Hackathon League, NGO

OCT 2023 → DEC 2024

- Designed official website and branding contents for the social media with 100M+ Impressions; raised \$100,000+ from Tiktok Ventures, BinanceLabs Ventures, Baidu Ventures, etc; scaled 200+ participants (2024) to 800+ (2025), a 4x YoY growth

● PROJECTS

Product Designer • Perplexity Travel Redesign Concept

1 WEEK SPRINT, OCT 2026

- Redesigned the Perplexity Travel user experiences solo and shipped as a HTML project.

Product Designer • HeyGen S25 Hackathon • CTO Award

36 HOURS SPRINT, AUG 2026

- Designed AI sign-language video translation prototype using internal avatar API with 2 engineers.
